OVERVIEW

I have over 13 years' experience in large multinational financial services businesses focusing on data science, management information, financial analysis and process improvement. In my most recent roles I led teams in measuring and reporting on business performance, providing actionable insights from the analysis of financial and operational data.

I have extensive experience in process overhaul and using data analytics and predictive modelling to inform business decisions.

I can start immediately, having just returned from a career break.

SKILLS & PROFICIENCY

Tableau

Alteryx

SQL, SSIS

R

Prophet

INDUSTRY CONTRIBUTIONS

Actuaries Analytical Cookbook - Created and supported a cookbook of data and analytics recipes, a resource to actuaries.

Information Note, Analysing Disability Income Experience - Contributed to information note on setting pricing and reserving assumptions for future claims experience.

EXPERIENCE

Deputy Appointed Actuary

Oct 2020 – Feb 2022

Westpac Life Insurance Services Limited, Australia

Reporting to Appointed Actuary

Key achievement: Accelerated experience analysis components from months to weeks - the more rapid granular analysis supported flexible financial modelling/ scenario testing.

- I joined the team to support the sale of the life business by Westpac Group through due diligence analysis, buyer workshops and Q&A sessions.
- Owned the BAU experience data analysis, reporting and review process.
- Led the team's efforts in streamlining the analysis processes
 - automated data ETL, Alteryx to SQL database
 - visualised deterministic predicted claim confidence intervals against actuals, Tableau
 - applied supervised learning methods to derive adjustments to predictions, R
 - communicated outcomes to the leadership team and managed stakeholders.
- Led data driven initiatives that contributed to pricing refinements.
- Led the team's efforts in the completion of monthly AIFRS profit and regulatory reporting.
- Designed and tested analytical models to support business decisions.
- Owned the financial analysis and communication process and outcome, enabling senior and executive managers to understand the key results drivers and take appropriate action.
- Managed and guided a team of financial services professionals (including offshore team members) to meet deliverables, improve efficiency and achieve their goals.

Head of Business Finance

Feb 2019 – Sep 2020

Reinsurance Group of America, Australia (RGAA)

Reporting to the Chief Financial Officer (CFO)

Key achievement: Accelerated BAU financial analysis from days to hours - tools highly praised by the Board and adopted in other geographies.

- Led the team's efforts in a complete automation of financial analysis and reporting, leveraging database architecture to eliminate dependencies on spreadsheets and streamline reporting and data visualization software to deliver tailored data-driven reporting.
- Owned the financial analysis and communication process and outcome. Challenged the result, drawing on strong relationships with other business functions.
- Championed data driven initiatives and projects that facilitated proactive client engagement.
- Collaborated with the legal, pricing, underwriting and claims teams on deep-dive analyses of performance drivers for selected blocks of business.
- Developed best-of-breed dynamic performance dashboards for senior management and local and parent Board / Board Committees.

Deputy Chief Valuation Actuary, Previously 2IC

May 2016 – Jan 2019

Reinsurance Group of America, Australia (RGAA)

Reporting to the Appointed Actuary

Key achievement: Together with the Chief Valuation Actuary (CVA), re-staffed and upskilled a team that had experienced high turnover, resulting in significant control uplifts.

- Co-ordinated the team's contribution to the annual financial statements and managed the relationship with 3rd line of defence functions.
- In conjunction with the CVA, led the team's efforts in the completion of monthly reporting, analysis of profits as well as quarterly Regulatory Capital reporting and APRA reporting.
- Supported the delivery of the Internal Capital Adequacy Assessment Process (ICAAP) report and the Financial Condition Report (FCR).
- Assisted the Appointed Actuary in preparing formal actuarial advice for the business.
- In conjunction with the CVA, championed 1st line of defence improvements.
- Led the team in cross-functional knowledge sharing and enhancing reporting.

Research Actuary

Reinsurance Group of America, Australia (RGAA)

May 2014 – Apr 2016

Reporting to the Head of Research/ CRO

Key achievement: Increased the frequency and granularity of data analysis for key blocks of business which allowed more dynamic repricing for rapidly evolving experience.

- Translated client analytics and industry experience into business insights/ predictive models and communicated results directly to RGAA management.
- Led the team's efforts in experience analysis/ developing assumption basis proposals.
- Collaborated on pricing exercises, notably longevity business; and an instalment TPD product, working closely with business specialists in claims and rehabilitation.
- Delivered RGAA's ICAAP report to the CRO and supported the FCR.
- Challenged the design of underlying models and analytics against intended purpose.

Corporate Actuary/ Actuarial Specialist

MMI - Metropolitan, South Africa

Jan 2009 – Apr 2014

Reporting to the Appointed Actuary

Key achievement: Streamlined the modelling of new products as well as product migrations through championing cross-team knowledge sharing.

- Led the team's efforts in the financial reporting of 14 international subsidiaries of varying complexity, communicating outcomes directly to MMI management structures.
 - Assessed the business impacts of new or altered products and changes to the capital regime.
 - Co-ordinated the migration of the valuation/reporting of products across divisions.
 - Co-ordinated the regulator stress test calculations for Individual Life products.
-
